EDUCATION:

2017– 2020   Bachelor's in information technology
CGPA: 3.25
Shaheed Benazir Bhutto University, Shaheed Benaziabad, Pakistan.

TECHNICAL SKILLS:

- **Programming Languages:** Advanced proficiency in Python with a strong understanding of Object-Oriented Programming (OOP) principles.
- **Data Science Analysis:** Proficient in conducting comprehensive data analysis tasks, including data preprocessing, feature engineering, exploratory data analysis, and statistical modelling.
- **Machine Learning:** Experienced in developing and applying various machine learning techniques, including supervised and unsupervised learning, for tasks such as classification, regression, clustering, and anomaly detection.
- **Langchain:** Proficient with LangChain, a framework for developing applications powered by language models, enabling context-aware and reasoning capabilities through Python.

SOFT SKILLS:

- **Problem-solving:** Strong analytical and problem-solving skills to troubleshoot technical issues and optimize system performance.
- **Collaboration:** Excellent teamwork and communication skills, demonstrated through group projects and team-based assignments.
